

SUMMER 2024 NEWSLETTER

Letter from the Vice President, K. Terry Jackson, Jr.

Welcome to summer! I was on the lake for a few hours today. Does it get much better? Blue skies, rich green vegetation thanks to the rain, crystal clear water, and the lake is at or above full pool. This is why we moved here. I'm sure it's the

same for many of you. We have a lot to be thankful for if you are on or about Lake Hartwell. With that goes the responsibility of caring for our lake for friends and family for generations to come. While you are out enjoying our lake, take a moment every now and then to pick up some trash. Or move a loose dock float to a Corps ramp. Or join one of our LHA organized clean up initiatives. If you are a LHA member, thanks! And we encourage others to join. Why? We are interested in activities and initiatives to try to keep Lake Hartwell the fabulous place we moved to. It takes work. It takes membership. Join us. Help us. Spread the word.

Enjoy the lake this summer. Safe boating!

HELP GROW LHA!

If you're receiving this newsletter, you already know all about LHA, and our commitment to the lake. Everything we do is to ensure that Lake Hartwell remains the jewel of the Upstate and receives the care and attention it deserves.

But what about your neighbors? We, the volunteers that manage the day to day activities of LHA, acknowledge that our members are our best membership recruiters. You already appreciate what we do and can share those details with other like-minded stakeholders.

Please do your part and share your newsletters with one of your neighbors. Encourage them to tear off the membership form on the last page or log on to our web site and join you and over a thousand others who do what we do together, **For the Sake of the Lake.**

WHY JOIN LHA?

- Learn and keep up to date on all things "Lake Hartwell".
- Keeps you current on any shoreline modifications and development that might affect your property or the lake environment.
- Adds your voice to LHA's relationship with the Corps of Engineers as well as county and state governments.
- Ensures Lake Hartwell will be kept clean, remain as full as possible and continue to be a safe place to enjoy.
- Allows you to take an active part in the future care and development of the Lake.

ANOTHER LHA REGIONAL MEETING A SUCCESS

In an effort to reach all residents around Lake Hartwell, LHA will continue to hold meetings in different regions of the lake. For the convenience of residents in Georgia, on May 30, LHA held a regional meeting in Hartwell. Approximately 50 members and guests attended the LHA meeting at the Adult Learning Center. The theme of the meeting was a focus of safety on the lake. After a welcome and introductions, Terry Jackson Jr, LHA Vice President, kicked off the meeting with a brief overview of the recent activities of the association. Jackson, also a Captain with TowBoatUS, provided attendees with information regarding the safety benefits of a TowBoatUS membership. See their website for more details: <https://www.boatus.com/products-and-services/boat-towing>.

Pictured here from left to right include LHA VP Terry Jackson Jr., Bill Fogerty, Sergeant Tim Vickery, and Ranger Ethan Franklin. Not pictured is Ranger Brandon Pierce.

The meeting also included updates from Bill Fogerty of Hart County Property Owners for their next meeting on June 17 and from Larry Cole of US Coast Guard Auxiliary for their upcoming Boating Safety Course on June 22 in Hartwell, GA. The featured speakers of the evening were representatives of the Georgia Department of Natural Resources, Law Enforcement Division: Tim Vickery, Ethan Franklin and Brandon Pierce.

Franklin captivated the audience as the main speaker where he outlined the divisions, the mission and vision of the agency. He stated that the agency has a lot of land to cover with over 37 million acres, 63 Georgia state parks & historic sites, 132 wildlife management areas, and 11 public fishing areas. Game wardens patrol 16,000 miles of rivers, 500,000 acres of impounded waters, and 100 linear miles of coastal shoreline out to 200 miles offshore.

Franklin also reported that Georgia has almost 333,000 registered boats. In the year 2021, 34,505 vessels were checked with 7,033 boating violations and 251 BUIs. There were 122 boating incidents with 60 drownings. Franklin also shared updates on the technology being used by the Law Enforcement Division with side scan sonar, sector scan and remotely operated vehicles. Another topic reported by Franklin was the financial side of the agency. In 2021, the agency was funded with \$23,518,437 from state funds, \$3,716,793 from federal funds and \$427,922 from other sources. The total cost to hire, train, equip, and maintain a new game warden is \$151,680.

The presentations and follow-up discussions were informative, and the meeting ended with a Q & A period. For more information about Georgia DNR go to <https://gadnrle.org/>. To reach a ranger 24/7/365 days a year statewide call *DNR on AT&T cell phones, 1-800-241-4113, or RangerHotline@dnr.ga.gov.

If you would like a meeting in your region or a speaker for your organization/association, please contact us at lhaofficemail@gmail.com to discuss further. To join LHA and learn about more meetings like this, please visit: www.lakehartwellassociation.org/community/join-us/.

DON'T FORGET YOUR LIFE JACKET (PFD)

South Carolina requires all children under 12 years of age to wear a USCG-approved Type I, II, III or V PFD while on-board a vessel less than 16 feet long. The PFD must be fastened and of proper size for the child. In Georgia all children under 13 years of age must wear a USCG-approved life jacket. This rule also applies to canoes, kayaks and paddle boards in South Carolina and Georgia.

ALL vessels (this includes kayaks, canoes and paddle boards) are required to carry at least one Coast Guard approved life jacket for each person on board. The jacket should be without rips, tears, or deterioration. If your boat is over 16 feet in length, you are also required to carry a Type IV (throwable) flotation device on board. This can be either a USCG approved boat cushion or USCG approved throwing ring. For paddle boarders there is a belt-pouch type inflatable PFD available, but it must be worn by the person, to meet the life jacket requirement. Also remember that when kayaking, canoeing or paddle boarding you must also carry a whistle for emergencies

EVERYONE on board a personal watercraft (popularly know as “jet skis”) and anyone being towed behind a vessel must wear a Coast Guard-approved properly fastened and fitted life jacket,

Life jackets do not expire, but wear and tear and prolonged exposure to elements eventually make life jackets unfit for use. The foam progressively loses its buoyancy and ability to effectively keep the head above water.

Make sure the life jacket fits. On the inside back of every life jacket it states whether it is USCG approved, the type of jacket (I, II, III or V), the size (S,M,L or XL) and the chest size range for that jacket. Children’s jackets also include weight range for the jacket. Life jackets for infants and toddlers have a neck support at the back of the jacket. It is imperative that any life jacket worn by a child be a good fit. If the life jacket is too large and there is a boating accident or the child falls out of the boat, the child can slide out of the jacket. Unfortunately this has happened before. If you are boating with friends make sure they have life jackets for children, otherwise it is wise to invest in one. Sometimes young children fight having to put on a life jacket, but most “puddle jumper” type swim vests are more comfortable and the child doesn’t mind wearing them. Just make sure that it is stamped USCG approved. Not all of these types of swim vests are approved by the coast guard. The “puddle jumper” type vest also works well if your child is playing around or in the water. Arm floaties are not USCG approved and are not recommended for any type of vessel. Be safe not sorry.

Different types of life jackets:

Type I

Type II

Type III

Type V

Type IV- Throwable

TOW BOATS

How many times have you heard it?--It's a boat....things break. It happens more than you think. New boats or old boats. You are not always near your home dock or at a convenient time or place to call a friend if something happens. Is there another alternative? Absolutely. A TowBoatsUS membership. It's kind of like AAA for cars, but on the lake. The Lake Hartwell TowBoats are piloted by USCG licensed captains. There are usually (3) boats stationed around the lake, so response time is

very reasonable for a lake this size. It's not just (unlimited) towing...TowBoats membership also provides fuel delivery, battery jumps or even a soft ungrounding. Membership is for any recreational boat you own, borrow or charter. And if there is a serious issue, like a sunken boat, TowBoats can also provide salvage and boat recovery work (this would be insurance related).

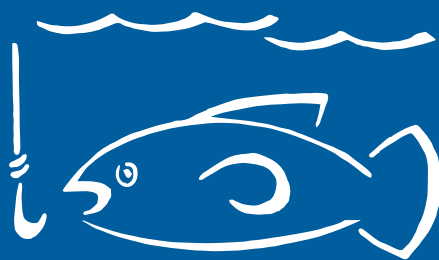

For more information or to join, go to this website: <https://www.boatus.com/towboatus/lake-hartwell>.

The Lake Hartwell TowBoatsUS also provides on-water powerboat training.

Let's Draw the Line . . .

Boundary Line Markings and Proper Uses of Public Land at Hartwell Lake

Introduction

The Hartwell Lake project annually provides a source of recreation of more than 13 million visitor days of use.* With 56,000 acres of water, 23,530 acres of land and a shoreline of 962 miles, Hartwell Lake is one of the Southeast's largest and most popular public recreation lakes. Sound management of this resource is necessary to protect and preserve the project for future generations while providing quality recreation opportunities for today's visitors. Management must insure a balance between the recreation user, the environment, and the conservation of project resources. Consideration must also be given to possible conflicts of use between the general public and the owners of private property adjacent to the project.

*1986 visitation figures

Private Use

The Lakeshore Management Plan furnishes guidance for the protection and preservation of the desirable environmental characteristics of the Hartwell Lake shoreline. Copies of the plans are available from the **Resource Managers Office**. **Public land adjacent to the lake is delineated into different areas of use.** This designation of public land allows the District Engineer to approve specific types of private use in certain areas around the lake. This private use is controlled through a permit/license program which may allow individuals with approved access to public land to construct and/or install specific facilities, such as a boatdock, water and electric lines. Although private facilities may be authorized, the ownership of adjacent private land does not convey any exclusive rights to the use of public land. The placing of structures or special use of public land without prior written authorization or contrary to the terms of the authorization, may constitute an encroachment.

An encroachment is the construction, placing, or continued existence of any structure or item of any kind under, upon, in, or over the project lands or waters and/or the destruction, injury, defacement, removal or any alteration of public property including natural formations, historical and archaeological features, and vegetative growth unless said activity is authorized in writing.

Past experience has proven that lot pins do not always agree with the established boundary line. In order to prevent encroachments, we advise adjacent property buyers to obtain the services of a licensed surveyor to verify the property line prior to purchase.

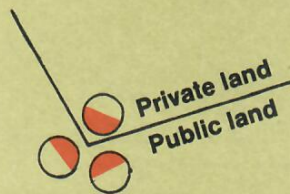

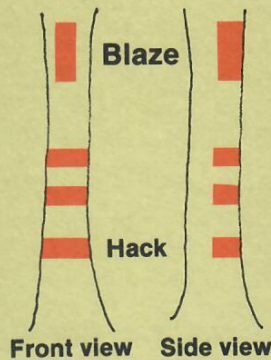

The Corps of Engineers requests the help of all citizens in preventing encroachments on the public land around Hartwell Lake. To assist in identifying the public property at Hartwell, an extensive boundary line maintenance program exists which includes the brushing out and painting of the boundary line every 3 to 5 years.

Boundary Line Witness Markings

"Painting of the line" actually means painting witness trees near the boundary line. At Hartwell Lake orange paint is used to paint the witness trees along the 810 miles of boundary. Drawings 1 through 4 illustrate the different types of markings and describe their meanings.

1

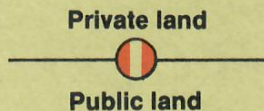

Corner Witness Tree

Tree is painted facing the corner. Tree is marked with one vertical blaze and three horizontal hacks.

2

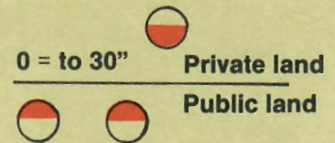

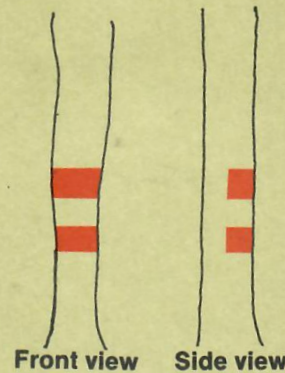

Center Line Tree

This witness is used when the line goes through the tree. Tree is painted on both sides with one vertical blaze and two horizontal hacks.

3

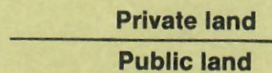

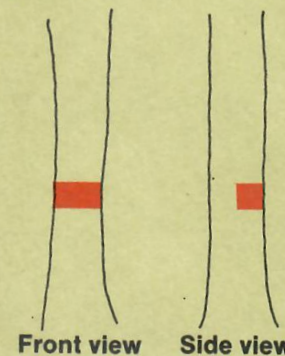

Line Witness Tree

The most common witness tree. Two horizontal hacks face the boundary line. Only trees within 30 inches of the boundary line are marked.

4

Banded Directional Tree

This type of witness is used only when there are no trees within 30 inches of the boundary line. One band is painted facing the line to show the general direction of the line.

Questions

If you have questions about the location of the boundary line, contact the Hartwell Lake Resource Manager's Office, (404) 376-4788. A field appointment with a Corps ranger can be scheduled to assist you in locating the boundary line or in answering any other questions you may have concerning encroachments and our permit/license program.

FAREWELL & WELCOME

Farewell to Outgoing Board Members

Brodie Brigman served on the board for two terms, serving as the Treasurer in 2018 - 2023. It was a great responsibility keeping track of Lake Hartwell Association (LHA) finances and making sure that all our reporting was done correctly. No matter the demands of the job, Brodie was always calm and accommodating. His extensive experience provided invaluable fiscal oversight and perspective to the organization through his time on the board. Over the years he has generously given of his time and talents to help support LHA and the lake he has called home for many years.

Don Haynie served on the LHA board for four terms, since being elected in 2010. He has provided consistent and thoughtful guidance from a lake-related business perspective to be a voice for commercial stakeholders around the lake. He helped guide the organization through several transitions and brought a broad perspective on business management. We have appreciated his insight, ideas, dedication, and advocacy for Lake Hartwell during his time on the board. As a fourth generation Andersonian and Lake Hartwell dweller since 1965, his perspective will be greatly missed.

We are truly grateful to these outgoing members who have volunteered their time to guide LHA, dedicating time and energy to help meet our goals. Thank you, Brodie and Don!!!

Welcome two New Board Members

We also want to welcome to the Board two new members that have filled open vacancies. We are excited to have these individuals join the board and bring their unique talents, expertise and perspectives to the work of the organization. LHA Board members serve a 3-year term and volunteer their time and energy to directly impact our community and our organization. Below are bios of each of our newest members.

Angela Kemp

Angela was elected to fill the vacant seat for LHA Publications. Angie moved to Lake Hartwell in 2022 to move closer to family. She is married with 2 daughters and 3 grandsons. She received her bachelor's degree from Illinois State University in Business & Communications and master's degree in Organizational Communications. She taught at Illinois State University for 2 years, worked for Saint Francis Health System for 8 years as Marketing & Communication Department Head & spokesperson and then worked for Caterpillar Inc for 25 years as Director of Global Human Resources. Her interests include family, watching her grandsons' sports, crafting, traveling, and anything water related.

Kyle Els

Kyle was elected to fill the vacant seat for LHA Treasurer. Kyle is an Accounting and Information Technology professional. He received his bachelor's degree in Accounting from the University of North Dakota in 1981. He also earned professional certifications of Certified Public Accountant (CPA) and Certified Management Accountant (CMA) in the state of Texas. He is grateful for his professional career spanning 30 years with The Coca-Cola Company. He started in the accounting field, rising up through the ranks to Director of Accounting before transitioning to Information Technology and installing enterprise-wide software for the company globally. His leisure activities include golf, travel, enjoying everything Lake Hartwell has to offer, and spending time with family and friends. He has been married for 43 years with 2 grown children and 4 grandchildren. He has happily called Lake Hartwell home for the last 10 years.

Adopt a Shoreline

CAMPAIGN NEEDS VOLUNTEERS

The Corps of Engineers and Lake Hartwell Association established a trash pick up program a few years ago, "Adopt- A-Shoreline." This program assigns or lets the volunteers choose to clean up segments of the Lake Hartwell shoreline and or the islands within its boundaries. The guidelines are similar to the Adopt A Highway program run by the SCDOT but you don't need to commit to a certain amount of time or a specified area. We encourage flexibility and creativity when keeping all shorelines free of trash.

Keeping our 962 miles of just shoreline clean is a massive undertaking and therefore we are asking for your help. The Lake Hartwell Association will provide volunteers with guidance, instructions, supplies, and disposal information. LHA invites all residents, visitors, scout groups, church organizations, community and civic clubs, and all other individuals who want to help! We are entering the busiest recreational time of the year and we need to increase participation in this important program! Thanks in advance!

LAKE WIDE CLEANING OPPORTUNITIES

For the Sake of the Lake please see the attached flier regarding the Splash Away the Trash Event. Lake Hartwell Association in conjunction with Lake Hartwell Partners for Clean Water will be organizing and implementing these clean up efforts. We need several more supply distribution “sites” and “site captains” to help with these efforts. In addition, if a volunteer would like to organize a specific island clean up we can assist. Identifying the areas most in need is up to our members. Our organizations cannot begin to know where the

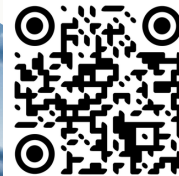

greatest need is with 56,000 surface acres and 962 miles of shoreline. There is also flexibility in clean up times. The distribution of supplies is on September 14th, 9:00am-12:00pm but clean up efforts and disposal of trash at a USACE ramp can take place anytime over the weekend. We could use your commitment to recognize an area in need and volunteer at the specified site before August 1, 2024. We will assist volunteers throughout the whole process.

Splash Away The Trash Event: Fall 2024

Join us for a weekend of community service and environmental stewardship across Lake Hartwell! Let's unite for a cleaner, greener environment!

with your name, the name of the person(s) in the photo, the date, & what “good” thing you saw. This is a great way to share best practices and provide recognition.

Here is our first photo of Don Cappaert bringing in a drifting dock float.

Thank you, Don!

NO RAIN, LAKE IS DROPPING...

by K. Terry Jackson

According to the Corps of Engineers website for Lake Hartwell lake level forecast (“Declaration”), the lake is forecast to enter Stage 1 Drought condition around 24 August. The management plan of the lake calls for the lake to be at 660’ MSL this time of year, and for the next few months. But that assumes we get ‘typical’ rains which we have not received. Towards the end of August, the level is forecast to drop below 656’ (the Drought ‘Trigger’ Level). This article is a ‘heads up’ and not the official press release that the Corps typically does. So we can all be looking for that press release if we continue to not receive any rain. And as a reminder, the level of Lake Hartwell is not managed as its own singular entity. Rather it is tied to weather conditions and lake levels for a couple more lakes down towards Savannah. It is most directly tied to Lake Thurmond. The lake level projection is updated weekly around Wednesday. You can find the info at this website location: <https://water.sas.usace.army.mil/cf/declarations.htm>. For those that need to move their docks to ‘chase the lake’, this site is very beneficial to helping you plan your dock moves. In addition, the Corps has excellent information regarding the Drought Plan and Pool Schematics (relative lake levels). Check it out!

HAVE QUESTIONS?

Send your lake related questions to LHANews@lakehartwellassociation.org, and we’ll publish your question as well as our answer in our next newsletter.

Question: What do the different orange lines mean on the trees of Corps property?

Answer: This question is answered within the article titled “Boundry Line Markings” so that you may see the various lines & their meanings.

SOUTH CAROLINA LAKE ASSOCIATION

We all know there's strength in numbers. Lake Hartwell Association partners with other South Carolina lakes in the South Carolina Lakes Association. This group shares lake related issues, concerns, successes, and challenges. One of the key areas this SC Lakes group is pursuing is teaming up on items requiring legislative actions. That's where the real strength in numbers comes in! LHA's involvement with this lakes group is

one of the many undertakings of LHA regarding lake enjoyment and lake concerns/issues.

Share your concerns and input with LHA officers. Do you want to become involved? Do you want to make a difference? Do you want your voice to be added to others to make a difference? Consider joining or renewing your LHA membership.
